NOTE: 1. Mica values are based on gross storage. 2. The Critical Rule Curve (CRC) used in the CRC1 are taken from the 1998-99 final Regulation - WY 1936-37. Only one rule curve is used for this study because the preceding final Regulation for 1995-96, 1996-97, and 1997-98 had critical periods less than one year.
