

CURRENT TEMPERATURE AUGMENTATION ANALYSIS

Water Temperature Analysis Model from 07/20/2025 to 08/09/2025 Observed Data to 07/30/2025

Current water availability is sufficient to maintain the following conditions at the LWG tailwater:

- July 23rd – Aug 14th: 69.5°F
 - Risk of days at 71°F has decreased due to real-time weather. Remaining risk at 70°F
 - Highest remaining risks; Doble Testing or extended heat waves above 100°F
- Aug – 15th – Sept. 1: 68°F

Current projected DWR elevation on Sept. 1st:

- 1535ft
