SPILL PRIORITY LIST – SUMMER
(July 1 through no later than August 31)

The Spill Priority List (SPL) defines how _Lack of Load_ spill will be distributed to projects in order to manage TDG on a system-wide basis. In the event of spill due to Lack of Load, spill will occur at projects in the following sequential priority order at the spill level defined for incrementally higher levels of TDG.

Level	Priority Order	Project	TDG (%)	_Example_ Spill Level (kcfs)
LEVEL 1 **State TDG Standard** [1] **("Gas Cap")** _In Level 1, Lack of Load spill will be allocated to projects that are not already spilling to the gas cap for FOP spill (i.e., projects that spill to the gas cap for FOP spill will be skipped over)._	1	LWG	120% / 115%	40

[1] State TDG standard (also referred to as "Gas Cap") is ≤110% in all project tailraces except during spill for fish passage at lower Columbia and lower Snake projects, as follows – Spring 2020 (April 1–June 21): ≤125% in the tailrace; Summer 2020 (June 22–August 31): ≤120% in the tailrace and ≤115% in the next downstream forebay. Daily gas cap spill levels ("spill caps") are posted online at: pweb.crohms.org/tmt/documents/ops/spill/caps/
